CONTAINER TRANSPORT

SOLUTIONS FOR YOUR TRANSPORT BUSINESS

Building a vital link in the logistics chain.

Picking up and delivering containers at ports and other junction points, means you're ready to become the next link in a global supply chain. And you'll need the right tools to work efficiently at every step.

Volvo Dynamic Steering the way you like it.

Are you looking for perfect stability and control at all speeds, combined with less strain on your shoulders? Or do you want assistance to avoid skidding and unintentional lane changes? Take a closer look at Volvo Dynamic Steering, it brings you all that. Either you choose a predefined setting or a fully customized one. The result? It gives you exactly the driving experience you want.

The visibility.

Our cabs offer excellent visibility with generous window areas and well-designed mirrors. You can even get an auxiliary window in the passenger door to cover the close areas. On top of that, you can add up to eight cameras – one of them being the pas-

senger corner camera, positioned in the passenger side rear view mirror.

I-Park Cool.

Taking a break or waiting at terminals gets better when the cab temperature is right. I-Park Cool is built in and electrically powered. And it keeps your cab climate cool without having your engine idling.

Gas power.

Our gas-powered trucks run on LNG* (liquefied natural gas) that instantly reduces your CO₂ footprint without compromising on productivity. They also offer the potential to reduce your fuel costs.

Want to know more about Volvo Trucks solution? Contact your local dealer or check out [VOLVOTRUCKS.COM](https://www.volvotrucks.com)

*) Prerequisite: Euro 6 specified fuel available on the market.

Volvo FH

- Excellent driver comfort.
