FORESTRY & TIMBER

SOLUTIONS FOR YOUR TRANSPORT BUSINESS

Adapting to the wild.

Tight spaces, minimal clearance, poor road surfaces and challenging gradients – you've seen it all. Transporting timber, wood chip and forestry products requires skill and precision from you and your equipment.

I-Shift with crawler gears.

Get excellent startability even fully loaded – and secure full control of your power at really low speeds. With the I-Shift with crawler gears, you don't have to compromise on either fuel economy or startability. You can have both. Just choose a faster rear axle ratio, which allows you to maintain cruising speed at much lower revs when you're driving on decent roads. It's more comfortable and better for your fuel efficiency.

Volvo Dynamic Steering the way you like it.

Are you looking for perfect stability and control at all speeds, combined with less strain on your shoulders? Or do you want assistance to avoid skidding and unintentional lane changes? Take a closer look at Volvo Dynamic Steering. It brings you all that. And it even offers remote steering control that can help you cut cycle times significantly.

Traction control.

The driver interface puts you in detailed control of the load on each axle, the bogie press function and all your differentials. Just turn the traction control clockwise to get a better grip.
