

Volvo Trucks. Driving Progress

REGIONAL HAUL

SOLUTIONS FOR YOUR TRANSPORT BUSINESS

The business partner everyone relies on.

When you're connecting the regional logistics hubs, there's a lot at stake. Delivery times, your own and your clients' reputation, contracts and future assignments. You're into it to keep each delivery spot on, day after day. Make sure that you have the right tools for the job.

The visibility.

Our cabs offer excellent visibility with generous window areas and well-designed mirrors. You can even get an auxiliary window in the passenger door to cover the close areas. On top of that, you can add up to eight cameras – one of them being the passenger corner camera, positioned in the passenger side rear view mirror.

Gas power.

Our gas-powered trucks run on LNG (liquefied natural gas) that instantly reduces your CO₂ footprint while maintaining your performance and productivity. They also offer the potential to greatly reduce your fuel costs.

On top of your data.

Volvo Connect is the web interface for your digital services, your digital home for a more profitable transport operation. Here, you can access our different fleet management services. This way you can take truck uptime, efficiency and productivity to new heights.
